

Michael Chang

Lead DevOps & Cloud Infrastructure Engineer • michael.chang@example.com • +1 (555) 567-8901 • Seattle, WA

PROFESSIONAL SUMMARY

Seasoned Cloud & DevOps Architect with 7.0 years of experience implementing Infrastructure as Code, CI/CD automation, and Kubernetes orchestration across enterprise AWS and multi-cloud environments.

TECHNICAL SKILLS

AWS, Kubernetes, Docker, Terraform, CI/CD, GitHub Actions, Jenkins, Linux, Python, Bash, Ansible, Prometheus, Grafana, Git, Nginx, Microservices, Agile

PROFESSIONAL EXPERIENCE

Principal DevOps Engineer – CloudForge Systems (2020 - Present (4+ years))

- Architected production Kubernetes (EKS) clusters hosting 200+ containerized microservices.
- Authored automated Infrastructure as Code using Terraform and Ansible on AWS.
- Constructed zero-downtime CI/CD deployment pipelines using GitHub Actions and Jenkins.
- Set up monitoring, alerting, and observability stacks with Prometheus, Grafana, and Linux tooling.

Systems & Cloud Administrator – Cascade Networks (2017 - 2020 (3 years))

- Wrote Python and Bash automation scripts for server provisioning and security patching.
- Administered Linux (Ubuntu/RHEL) systems, Nginx reverse proxies, and SSL certificates.
- Managed AWS VPC, EC2, S3, IAM, and CloudWatch infrastructure.

EDUCATION

B.S. in Software Engineering, University of Washington (2017)

KEY PROJECTS

Multi-Region Cloud Migration: Migrated 50+ on-prem services to AWS EKS with Terraform.

GitOps Automation Pipeline: Implemented automated branch preview environments using Docker and Kubernetes.
